COURSE DESCRIPTION

This course offers a review of important and timely topics in the field of perinatal medicine. Based on a review of the literature, input from our own expert faculty, and analyses from past conferences, we are proud to offer a comprehensive program with topics that include: an update on amniotic fluid embolism, reducing errors and improving outcomes in antepartum testing, employing evidence-based guidelines and standardized safety principles for managing fetal structural and genetic conditions, and disparities in maternal health. In addition, evidence is examined to set a practical, clinical approach to stillbirth, fetal growth restriction and preterm labor in pregnancy and the perinatal period. Valuable insights will be provided into prenatal diagnosis and maternal mortality. Lectures by faculty from the Keck School of Medicine of USC and distinguished guest faculty from the Baylor College of Medicine and University of California, San Francisco will outline controversies, discuss recent developments, and suggest recommendations. Participants have direct access to the speakers and ample opportunity for intensive question and answer post-lecture discussions.

TARGET AUDIENCE

The program was developed for gynecologists, obstetricians, perinatologists, neonatologists, nurses, nurse midwives and other allied health professionals. It is USC's mission that this educational opportunity provides participants with objective, evidence-based clinical content, to incorporate into their practices and improve the clinical care and further the well-being of their patients.

COURSE OBJECTIVES

By the end of the course, participants will be able to:

- Assess current literature regarding the management of amniotic fluid embolism in pregnancy.
- Formulate a practical plan to manage preterm labor.
- Describe and incorporate a treatment plan for prenatal diagnostic testing and options.
- Apply practical tips to thoroughly assess and manage fetal growth restriction in pregnancy.
- Describe a practical approach to work-up of stillbirth.
- Assess the controversies surrounding maternal mortality.
- Construct a practical algorithm for the management of antepartum testing.
- Apply a standardized approach to fetal heart rate monitoring.
- Describe the risks and treatment strategies for lower cesarean section rates.
- Recognize abnormal imaging patterns in the various trimesters of pregnancy.

ACCREDITATION STATEMENT

The Keck School of Medicine of the University of Southern California is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to provide continuing medical education for physicians.

CREDIT DESIGNATION

The Keck School of Medicine of the University of Southern California designates this live activity for a maximum of 19 *AMA PRA Category 1 Credits™*. Physicians should claim only the credits commensurate with the extent of their participation in the activity.

The following may apply *AMA PRA Category 1 Credit(s)™* for license renewal: Registered Nurses may report up to 19 credit hour(s) toward the CME requirements for license renewal by their state Board of Registered Nurses (BRN). CME may be noted on the license renewal application in lieu of a BRN provider number.

Physician Assistants: The National Commission on Certification of Physician Assistants states that *AMA PRA Category 1 Credit(s)™* accredited courses are acceptable CME requirements for recertification.
