6th Annual Practical Urology

1st Annual Artificial

COURSE DESCRIPTION

As the **6th Annual Practical Urology** conference returns, an exciting new session has been designed to showcase **state-of-the-art-urology** and **cutting-edge applications of artificial intelligence in surgery & medicine: 1st Annual AI West Med** session.

Our **6th Annual Practical Urology** conference covers advanced robotic, open, endourologic, endoscopic, image-targeted, focal therapy, microsurgical, prosthetic, and reconstructive surgeries and their complications, as well as medical therapies covering the entire range of urology. We feature semi-live surgeries, hands-on training, master classes, lectures, debates, and interactive panel discussions.

Our **1st Annual AI West Med** session covers emerging healthcare applications of artificial intelligence (AI), including clinical documentation, digital/wearable therapeutics, computer vision, generative AI, discipline-specific applications (surgical robotics, radiology, pathology), etc. With speakers drawn from academic and the corporate world, the goal of the **AI West Med** session is to give participants a clear understanding of currently available AI tools with immediate, practical application in their daily practice today.

AI West Med Sessions and Hands-On Workshop are Non-CME Sessions.

TARGET AUDIENCE

This course is intended for local, regional, national, and international practitioners in urology, medical oncology, and medical/industry professionals interested in exploring applications of artificial intelligence in healthcare.
